

## Pinakothek der Moderne, Munich

Artistic fascination: tastefully presented in twelve showcases

In addition to numerous projects in the interior lighting sector, our wide-ranging expertise is also in demand for museum lighting. feno has designed the lighting for twelve showcases at the Munich Pinakothek der Moderne art gallery. Thanks to our fd dmx 4-48 350 dimmers each work of art is displayed in warm white and cold white light colours. We paid special attention to the lighting for the angled back panels of the showcases. The aim was to create uniform illumination that did not dazzle visitors despite the angled back panels. Our fc s.dmx 48u controller made this possible because the dynamic lighting scenes can be fully programmed via the software and precisely controlled.

### Used Products:

Project-specific LED modules (warm white, cold white);  
fc s.dmx 48u; fd dmx 4-48 350

**Contractor:** Staatliche Graphische Sammlung Munich

**Light planning:** feno GmbH
